

PIGLET START

ART.NR. 01110

Piglet Start has been specially formulated for feeding young piglets.

When piglets are weaned, they must be able to get by without breast milk. That weaning moment is crucial in the life of a young piglet. Therefore, it is advisable to already start feeding small amounts of "solid" food to young piglets before weaning (in addition to breast milk).

Piglet Start is formulated on this basis and suitable for supplementation from about 2 weeks before weaning up to a maximum age of 12 weeks.

To support the transition from breast milk to solid food optimally, Piglet Start contains a high percentage of dairy products. These dairy products support good intestinal function, while the gastrointestinal tract is getting used to the presence of other raw materials in the feed. In addition to dairy products, Piglet Start contains purely vegetable products.

Piglet Start also contains extra heat-treated cereals which makes the feed very tasty. The high content of vitamins and trace elements and added essential fatty acids support a healthy development of the piglets.

Nutritional value per kg:

Crude protein	16.9 %	Crude ash	5.5 %
Crude fat	4.1 %	Calcium	0.6 %
Crude fibre	3.0 %	Phosphorous	0.5 %

Additional per kg:

Vit. A	15,000 IE	Vit. B12	40 mcg
Vit. D3	2,000 IE	Choline Chloride	150 mg
Vit. E	125 IE	Pantothenic acid	22 mg
Vit. K3	1.5 mg	Niacin	40 mg
Vit. B1	1.0 mg	Folic Acid	2 mg
Vit. B2	6.0 mg	Biotin	300 mcg
Vit. B6	1.5 mg	Copper	90 mg

3 mm diameter cubes for an easy intake

Very tasty due to the use of heat-treated cereals

High percentage of dairy components for a smooth transition from breast milk to solid food

High in vitamins and essential fatty acids to support bowel function and health

Packaging: 25 kg/bag

FEEDING RECOMMENDATION:

This is a complete animal feed which can be used as the sole feed. The animal should always have access to fresh water. A newborn piglet firstly needs sow's milk. We recommend to start feeding Piglet Start about 2 weeks before weaning.

Piglet Start then can be fed as a sole feed up to an age of 8 weeks (according to need). Thereafter, Piglet Start can be combined with other single feed materials up to an age of 12 weeks. See also the instructions on the label of the bag.
